WORK HISTORY

IT System Developer

[June 2008 – Present]

Faronics www.faronics.com

Vancouver – Canada

- Integrated all middle-tier systems with Salesforce.
- Architected and developed a web interface Order Entry System (OEI) that reduced data entry time by 97% and almost eliminated errors (duplicate and uncompleted orders). The creation of the OEI included a taxation module that allows our accounting department to calculate taxes for US, Canada and Europe reducing the tax calculation time by 95%. This project was completed on the estimated time and it is currently functional.
- Developed an “Order Engine” (OE) (ACCPAC C#) that automates the sharing of electronic accounting documents (Orders, PO’s, Invoices, Shipping) between companies, which reduced by 98% the invoice processing time. This project was completed on the estimated time and deployed to production.
- Architected and developed a web service that transforms XML data entered on our online store into a Purchase Order (PO) which reduced manual data entry by 100% and reduced by 90% the cost of processing small orders.
- Architected and developed a web application in order to manage Faronics Asset Inventory which eliminated redundant licensing purchase and reduced by 100% the costs of auditing licensing compliance. It allows the company to track their assets accurately and identify any unused licenses.

Technology Summary: ASP.Net, C#, SQL 2005/ 2008 R2, HTML, JavaScript, AJAX, XML, DOM, IIS 7, Crystal Report, SubVersion

Vendor Integration: Salesforce, Sage ACCPAC, Sage CRM, Avatax, eSellerate, Optimal Payment

Owner at www.visbal.com

[June 2000 – Present]

www.visbal.com

Vancouver – Canada

- Architected and developed a file management web application for the events Industry.
<http://www.clarksav.org>
- Architected and developed multiple web application projects.

Technology Summary: ASP.Net, C#, SQL 2005/ 2008 R2, HTML, JavaScript, AJAX, XML, DOM, IIS 7
